

htc P6300

The perfect mobile enterprise partner.

Introducing the HTC P6300 - a powerful PDA phone designed for today's demanding mobile enterprise environments. Featuring an over-size touch screen and generous on-board/expandable memory, it's the perfect choice for industries that demand flexibility and reliability of communication and application usage.

From warehousing and fleet management to custom applications, it has the power, memory and functionality to be a top performer in your mobile business.

The P6300 is the perfect tool for customer and service-driven environments. You can manage and develop applications with the robust Windows Mobile® 5 operating system, edit and view Microsoft® Office documents, go online and manage emails with ease.

View images, media and data with complete clarity on the sharp 3.5-inch intuitive full-colour touch screen. Communicate with colleagues and customers globally and integrate seamlessly with existing IT systems.

Improve your productivity with rapid processing, ample data storage and scale up memory. You can also add accessories with SDIO compatibility.

For enterprise mobility and vertical market solutions, choose the HTC P6300.
